

Mutual funds on a shared blockchain

Erika Danielsson, Head of Nordic Fund Market

Johan Toll, Head of Blockchain

Can the fund industry share one common infrastructure by leveraging blockchain technology?

What is blockchain?

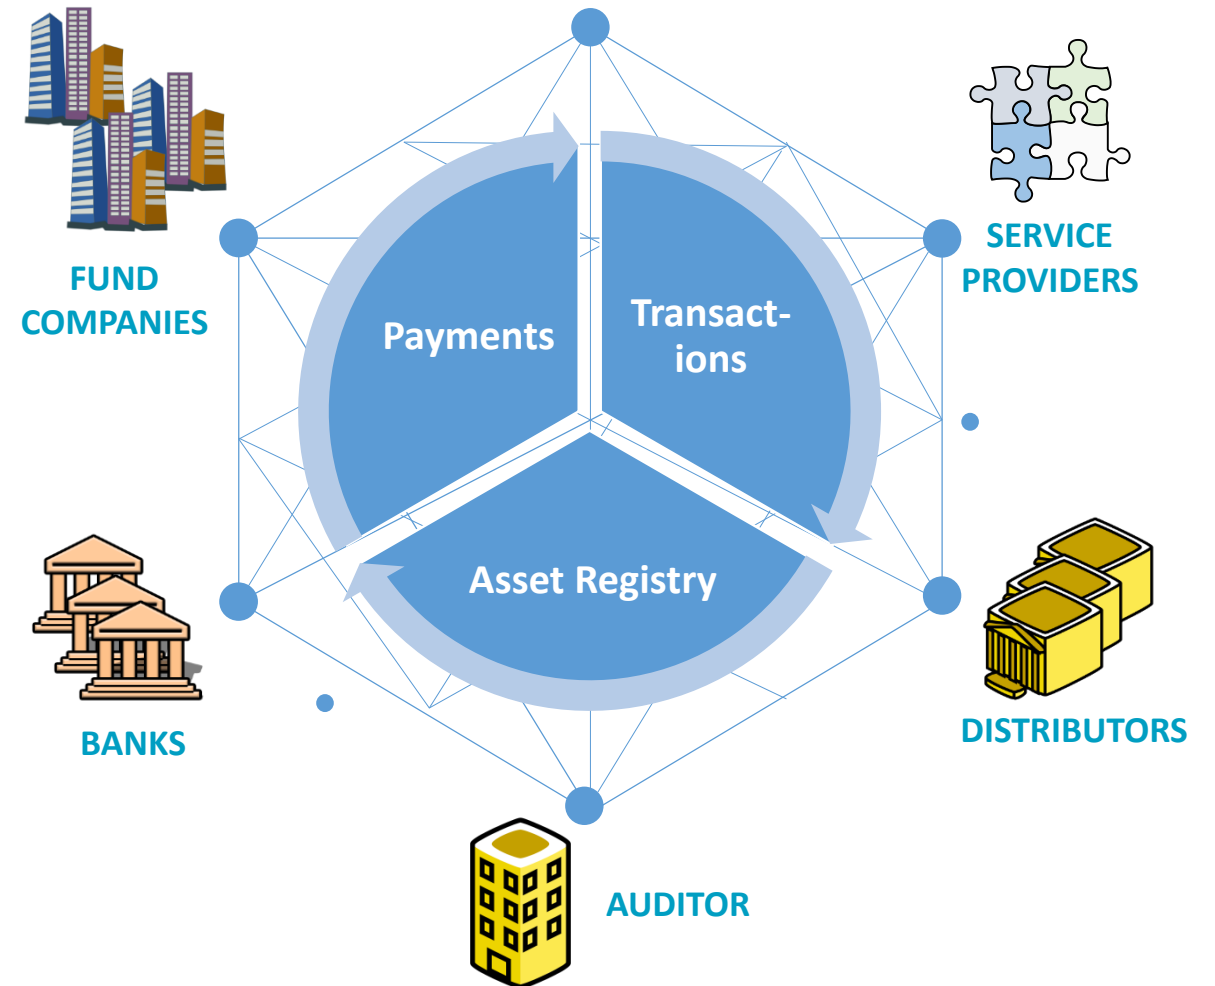

A fragmented market with many isolated solutions

Distributed and shared ledger of records

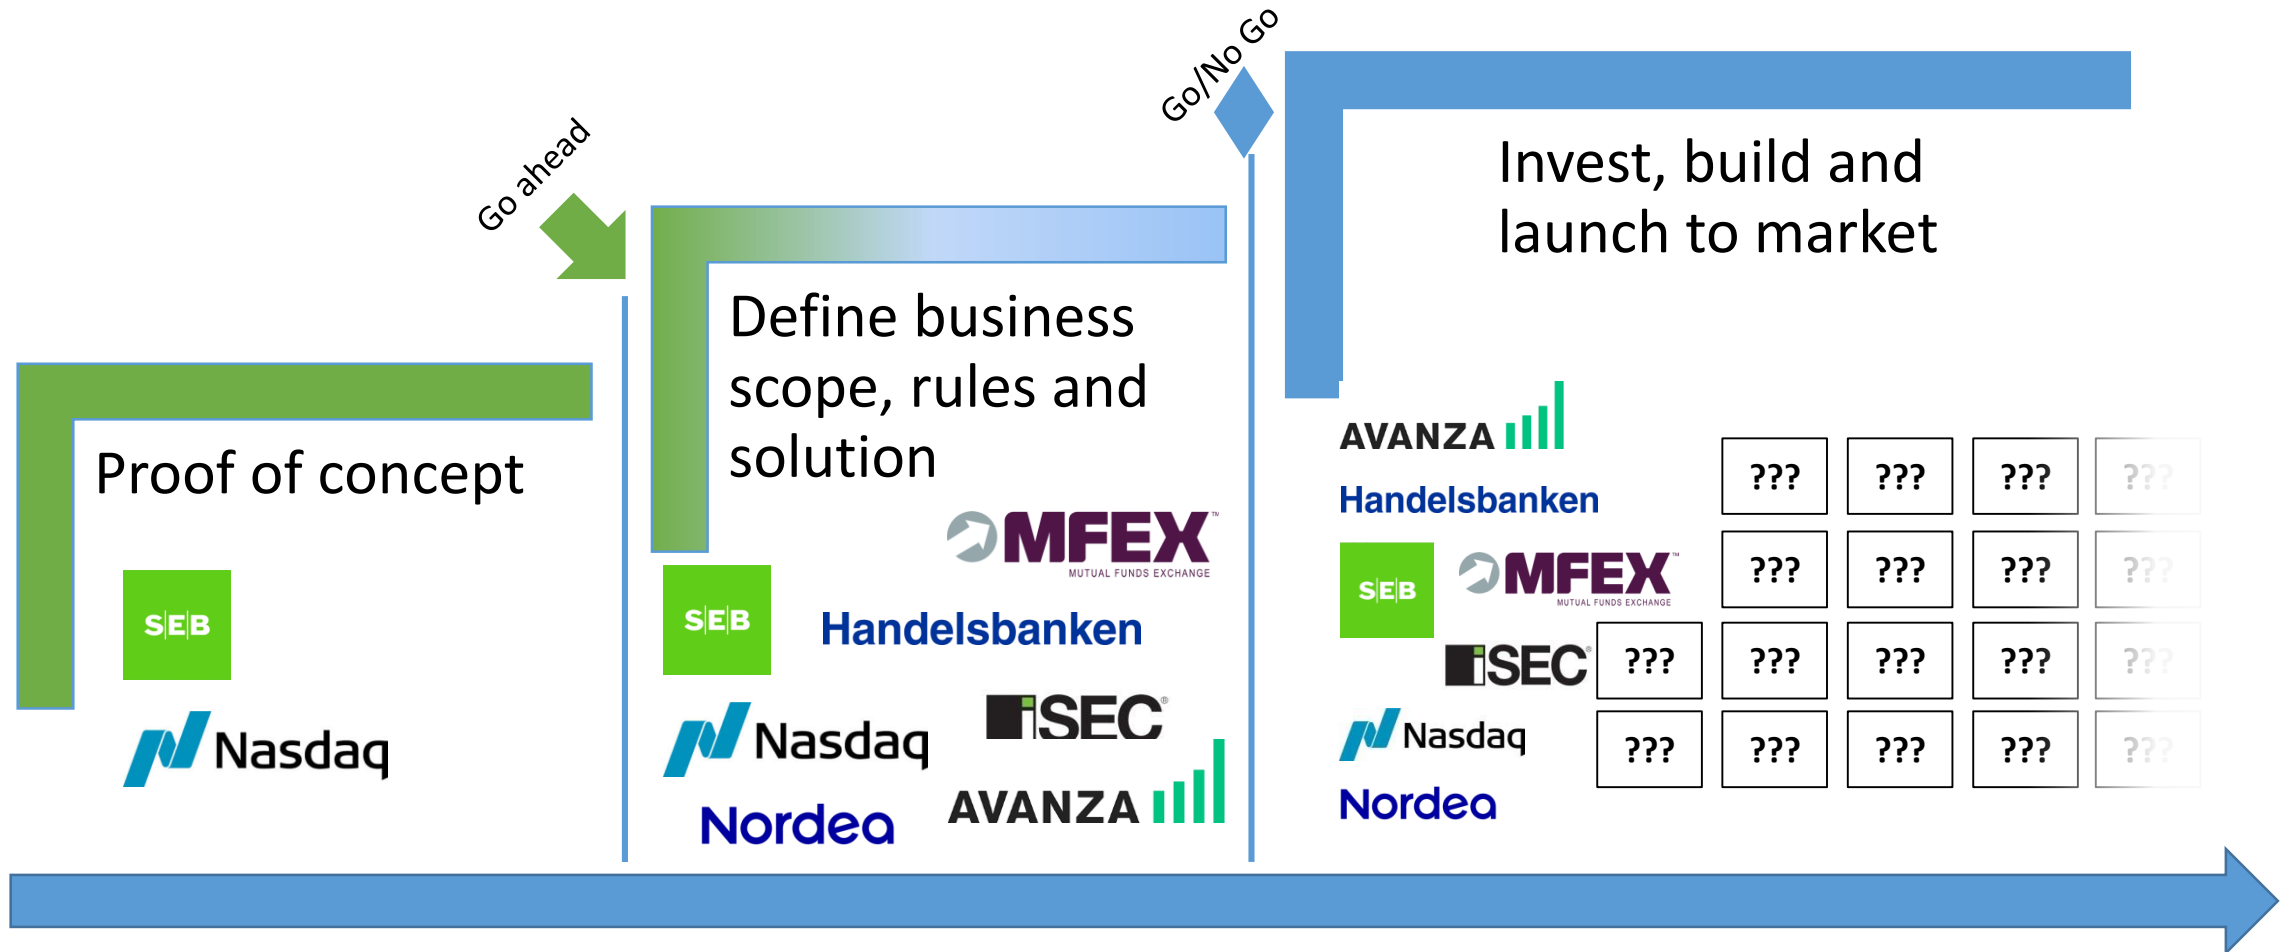

Why blockchain?

The fund market of tomorrow

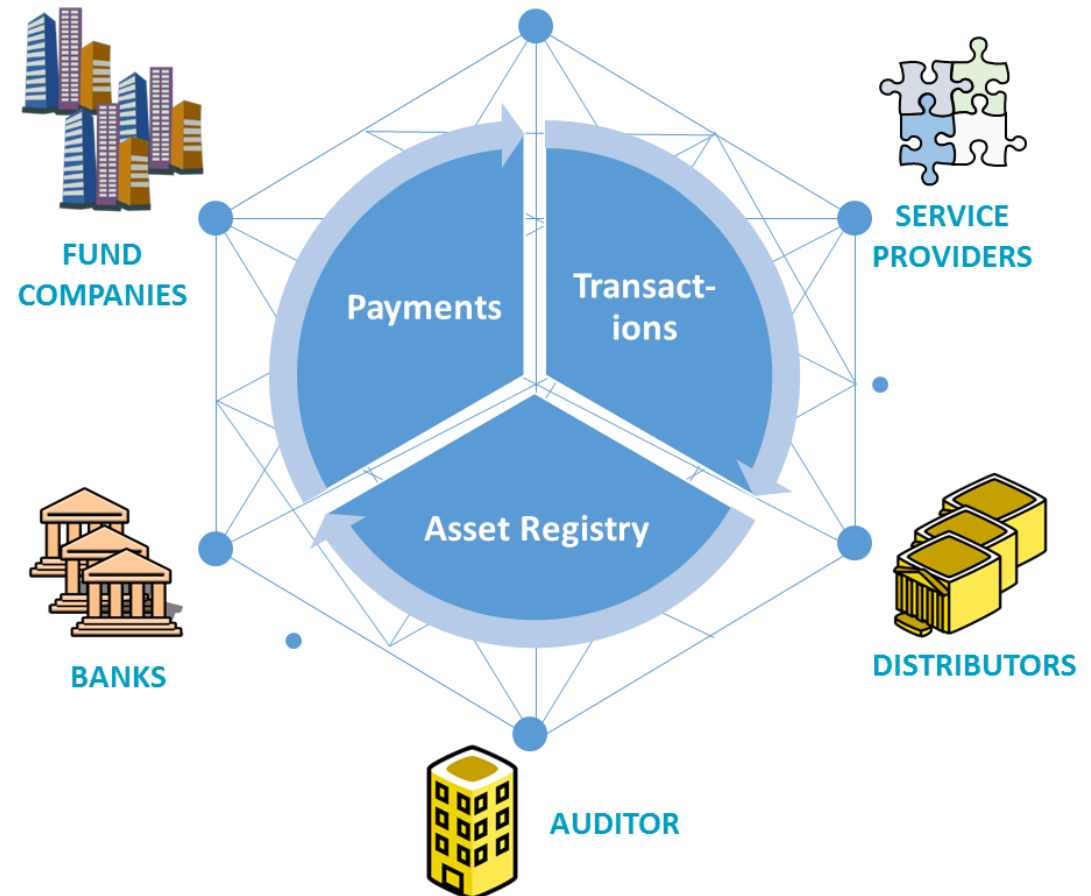

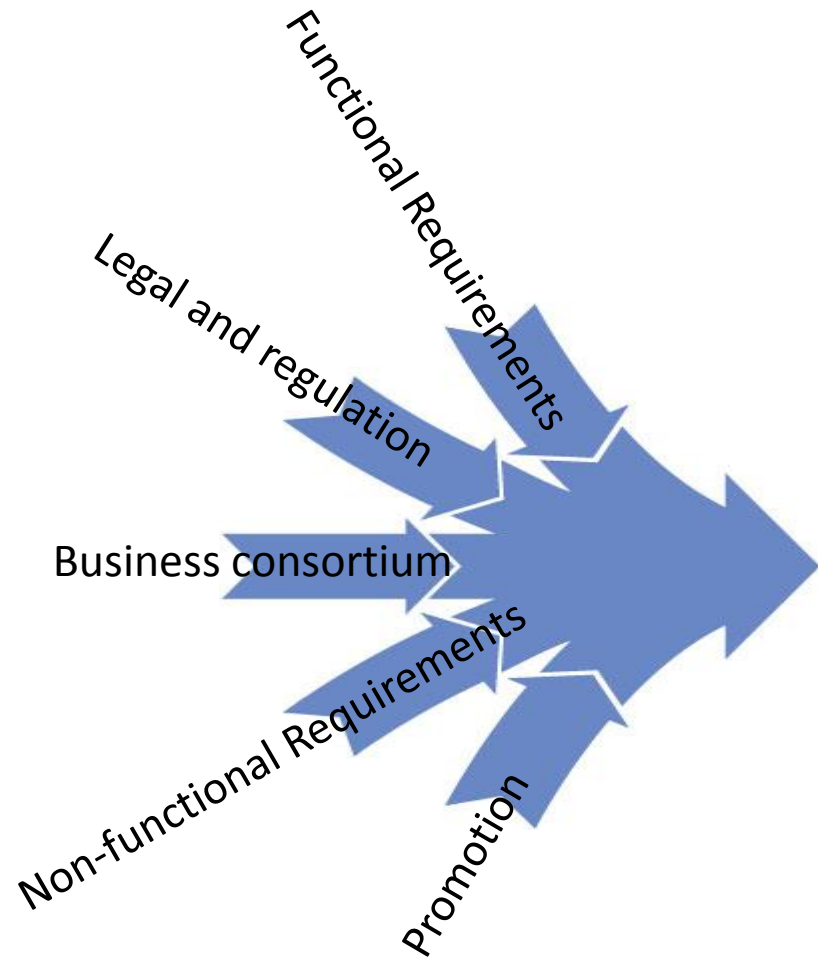

- One shared infrastructure - jointly owned and governed
- Indisputable records of transactions and holdings
- Secure and efficient settlement of fund units and payments
- Standardized access and information

An industry collaboration

Project workstreams
